IMMUNIZATION STATUS – Students must provide documentation of satisfactory immunization status for the following:

a. Tetanus-Diphtheria Toxoid - Most students will have completed their original DPT (Diphtheria, Pertussis or "Whooping Cough" and Tetanus) series during their childhood. If the student was older than six years, the primary immunization series required three injections of TD. The date of completion of either series and the date of a TD (Tetanus-Diphtheria) booster within the past ten years must be recorded on the Health Examination Form. Please indicate number of immunizations received in the series and dates of the boosters. If the student is due for a TD booster at this time, he/she should have it administered at least two month prior to classes, with the scheduled date of the immunization noted on the form.

b. MMR (Measles, Mumps, Rubella) – Students must show proof of a positive titer. If titer is negative, student must be re-immunized and retested with blood titer results showing immunity recorded on the Measles, Mumps, Rubella Form. Rubella also known as German Measles Rubeola also known as English Measles

c. Varicella - Students are required to submit proof from a physician or health institution of having a positive titer. If titer is negative, student must be re-immunized and retested with result recorded on the Verification of Having Varicella (Chicken Pox) Illness, Immunization, and Blood Titer Test Form.

d. TB Test - The two-step TB Mantoux Test or QuantiFERON report is required for all students admitted to the Nursing Program and a one-step or QuantiFERON is required for every subsequent year in the program. A physician will determine the appropriate follow-up for positive results. The results of the TB Mantoux Test or Chest X-Ray should be indicated on the TB Mantoux Skin Test or Chest X-Ray Form.

The PPD and/or Chest X-Ray can be administered by your private physician or at the County Tuberculosis Clinic located on the ground floor of the Bell Greve Building at Cleveland MetroHealth Medical Center. The telephone number is (216) 778 - 8305. An appointment is required. The PPD is also available at the CSU Health & Wellness Services Department.

e. Hepatitis B – The School of Nursing requires that all nursing students receive the Hepatitis B Vaccine. This is to be administered as a series of three. The date of each dose is to be recorded on the Verification of Completed Hepatitis B Immunization Form and submitted after each injection. Documentation of a positive titer is required to show immunity. The vaccine is also available at the CSU Health & Wellness Services Department.

f. Seasonal Influenza (Flu Shot) Vaccination - The Centers for Disease Control established the requirement that anyone working in any health care setting must receive a Flu Shot every year. Documentation must be recorded on the Seasonal Influenza (Flu Shot) Vaccination Form and submitted by October 15th ANNUALLY to be qualified to continue or begin clinical. **In the case of an allergic reaction to the flu vaccine, an official from the physician must be submitted annually, listing the diagnosis and the physician’s contact information.
